

## PROJECT NOTE – ALIENPRENEUR LINKEDIN FONT GENERATOR

Project Title: Professional & Fancy LinkedIn Font Generator

Brand Owner: The Alienpreneur™ (Alienpreneur LLC)

Website: <https://fonts.alienpreneur.com>

Repository Purpose: Live GitHub Pages project for Alienpreneur's experimental web tools.

### OVERVIEW:

This project hosts the LinkedIn Font Generator — a lightweight, privacy-first web tool for styling LinkedIn text using Unicode transformations. It runs entirely client-side (no tracking, no data collection) and allows users to preview, copy, and use professional fonts that preserve hashtags and mentions.

### KEY TECHNOLOGIES:

- Hosting: GitHub Pages ([fonts.alienpreneur.com](https://fonts.alienpreneur.com))
- Frontend: HTML, CSS, JavaScript
- Analytics: Plausible.io (optional)
- SEO: Full Open Graph + Twitter + Schema.org JSON-LD
- Icons: favicon.png, favicon-192.png, apple-touch-icon.png

### DOMAIN & DNS:

Custom Domain: [fonts.alienpreneur.com](https://fonts.alienpreneur.com)

CNAME: fonts.alienpreneur.com

GitHub Pages: Branch main, Enforce HTTPS ON

DNS verified via [omotayoadediran.github.io](https://omotayoadediran.github.io)

### SEO & METADATA:

Includes title, description, canonical, Open Graph, Twitter, and Schema.org JSON-LD. Publication metadata added (published\_time, modified\_time, author). Preview image verified and working (preview.png, 1200x630px).

### GOOGLE SEARCH CONSOLE:

Verified. Used to clear 'Likely Spam' false flag after initial blank-page crawl. Reindex requested after adding visible text and meta tags.

### LINKEDIN PREVIEW:

Verified via LinkedIn Post Inspector. OG image loads correctly, publication date displays, and all warnings cleared.

### MAINTENANCE NOTES:

- Quarterly DNS/HTTPS verification.
- Re-scrape with LinkedIn Post Inspector after meta edits.
- Reindex via Google Search Console after content updates.
- Maintain preview.png alignment with brand look.
